

ALL HAZARDS THREAT VULNERABILITY AND RISK ASSESSMENT (TVRA)

A quality **Threat Vulnerability and Risk Assessment (TVRA)** of your school, business or house of worship facilities is not complete if you don't include an **"All Hazards"** component. While most threat assessments evaluate your facility policies and procedures, most assessments don't consider other dangers. True Security Design has taken the years of experience of our Homeland Security trained evaluators to create an "All Hazards" approach that considers all dangers we can face in these modern times.

Our experience and comprehensive approach deliver optimum results for your facility.

The **All Hazards TVRA** covers aspects of a quality assessment while going to the next level by looking at other weather and disaster related incidents such as:

- Tornado
- Hurricane
- Tsunami
- Earthquake
- Infrastructure Damage
- Terror Incident
- Major Power Outage
- Flooding
- Widespread Illness or Epidemic
- Major Fire or Explosion
- Large Outdoor Event Incident
- Civil Unrest
- Custom Assessments Available

Another major addition to the True Security Design threat assessment is the **Recovery Plan** option. If your school or business is hit by a major disaster or violent incident, how will you recover and work towards getting back to normal? We can help create that recovery road map so your company can begin to heal. This recovery option is one that most people do not consider until after an event has happened.

The Process

1. ASSESS the existing security protection in terms of countering the identified security risks.

2. EVALUATE identified threats and establish the level of risk, the likelihood of an adverse event and its resulting impact.

3. PROVIDE gap analysis to isolate areas where your security program does not meet industry best practices.

4. RECOMMEND risk control strategies to mitigate identified security risks to an acceptable level at an acceptable cost.

All TVRA's include a step-by-step roadmap for remediation based on severity.

"Joe's thorough analysis of both our strengths and weaknesses enabled the district to create a solid plan for securing our district. Furthermore, his interactions with staff throughout his visits made them feel confident in the recommendations contained within the TVRA."

John Spalthoff, Superintendent Of Schools, Spring Lake Heights Schools
